REHAB MANAGER

The role of the Rehab Manager has grown significantly over the past few years, making it the facility's key position responsible for therapy program development, RUG management and reimbursement. The Rehab Manager has an impact on outcomes, length of stay, RUG utilization, resident and family satisfaction, survey outcomes, revenue and more. Recent changes in the MDS 3.0 have placed additional responsibility on Rehab Managers for MDS scheduling and RUG stability. Ongoing changes to the RAI Manual and the MDS assessment make it difficult to stay ahead of the curve. Managers need a resource they can turn to, improve their workflow and help prevent costly mistakes.

Montero Therapy Services is a team of long term care professionals providing Members-Only services to facilities nationwide, including training, education and support for key staff members like MDS Coordinators and Rehab Managers. Our RAC-CT certified therapists bring a deeper understanding to the MDS 3.0 component and its reimbursement implications. Our staff can assist the team with PPS scheduling, RUG Utilization, MDS decision making, trouble shooting or complex billing issues. Members have found our live support feature for Rehab Managers to be an excellent resource to assist with the decision-making process that ultimately impacts the facility bottom line. With our support, members have prevented PPS scheduling errors and MDS coding errors before they occur, and have even recouped their annual fee with one phone call!

Talk to your Administrator today, subscribe, and have peace of mind that you have a resource in your corner!

Results:

- *Avoid MDS coding and scheduling errors
- *Avoid costly default and provider liable days
- *Increase PPS and Case Mix reimbursement
- *Improve Rehab, QM/QI, PPS and CMI coordination
